

Designing inclusive and scalable collective energy actions

Date: Wednesday 3 May 2023 – 10:00-11:00 CEST

[>> REGISTER HERE <<](#)

Workshop description

Collective energy actions are crucial for involvement of diverse stakeholders in clean energy transition. But how do we make sure that collective energy actions, including energy communities are designed to be inclusive, scalable and replicable. In this webinar we will present some of the results of DECIDE on this topic and discuss on designing initiatives to be inclusive, scalable and replicable through legal obligations, and monitoring these aspects of initiative as it grows and changes through specific key performance indicators.

Join us for this interactive webinar as we present our results and hear from experts outside of DECIDE and from all of you.

Agenda

- | | |
|-------|--|
| 10:00 | Welcoming by DECIDE project coordinator
Lucija Rakocevic, Th!nk E, moderator |
| 10:05 | Design of contractual agreements within collective energy
Gosia Matowska, Th!nk E |
| 10:10 | Making collective energy actions inclusive to all
Jens Lowitzsch, Kelso institute, Berlin |
| 10:15 | Monitoring inclusivity and scalability through KPIs
Michael Brenner-Fließer, Joanneum Research |
| 10:20 | Panel discussion and interaction with audience |
| 10:50 | Conclusions and future steps |
