

# DECIDE TO REPLICATE

What we learned from our work on  
**enabling framework?**

# Energy communities Hub

Collective actions including energy communities

# Regulation as enabler

- Annual **policy briefs** analyzing state and way of transposition
- Regulation **affects key aspects** of energy communities and collective actions:
  - Subsidies
  - Spatial boundaries
  - Allocation of energy
  - Legal form

# Existing business models categories

Collective generation and trading

Collective service provision

Community owned grid

Collective investment in a community project

Collective self-consumption (residential)

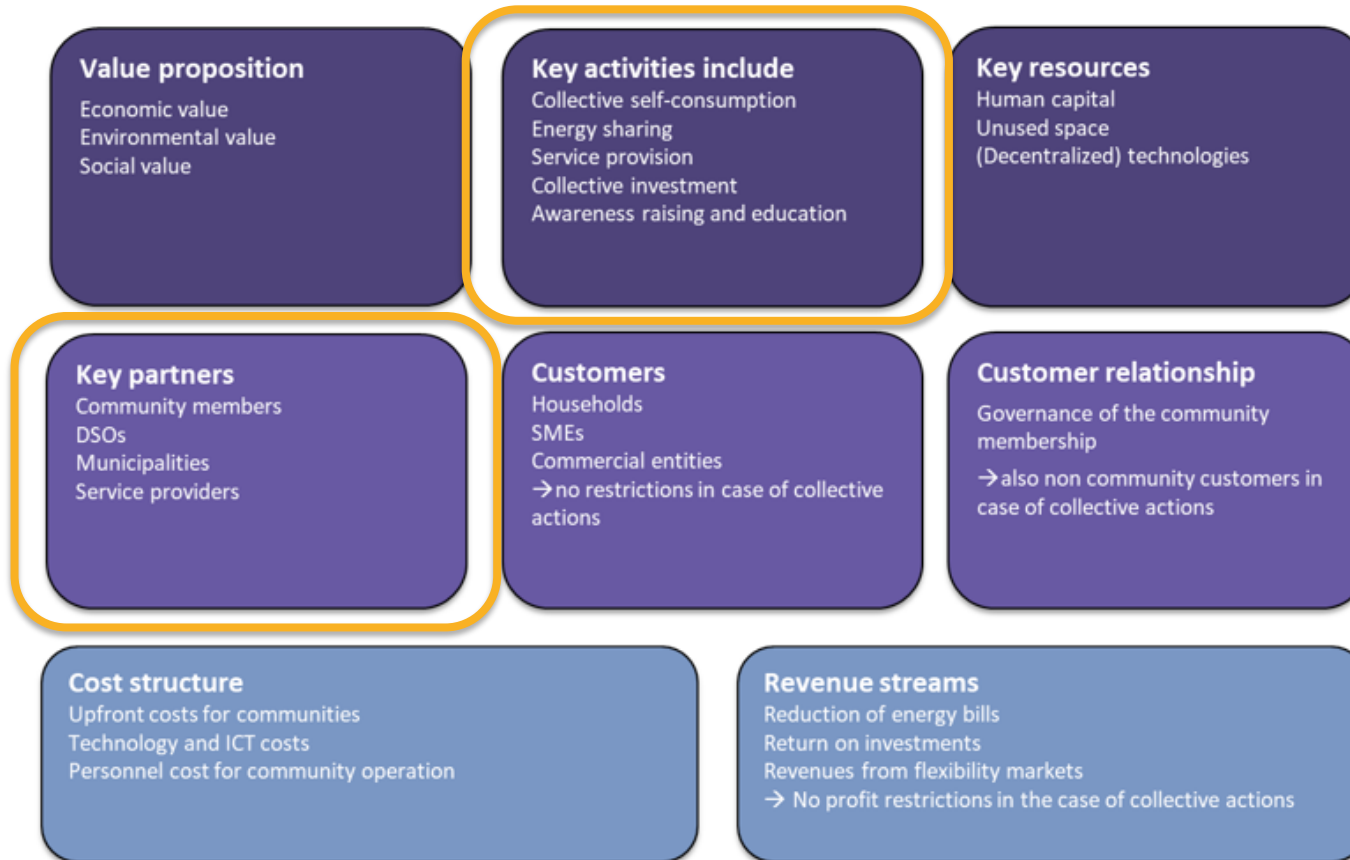

Collective investment in independent energy project

Collective self-consumption (industry)

# Emerging business models

# Contractual obligations and governance

- provides for the **further development** of existing EC/CAs
- Provides for **transparency, equality, diversity and inclusion**
- contribute to **increased investments in RES**
- represent forms that are **replicable**

# Lessons for replication of EC/CA

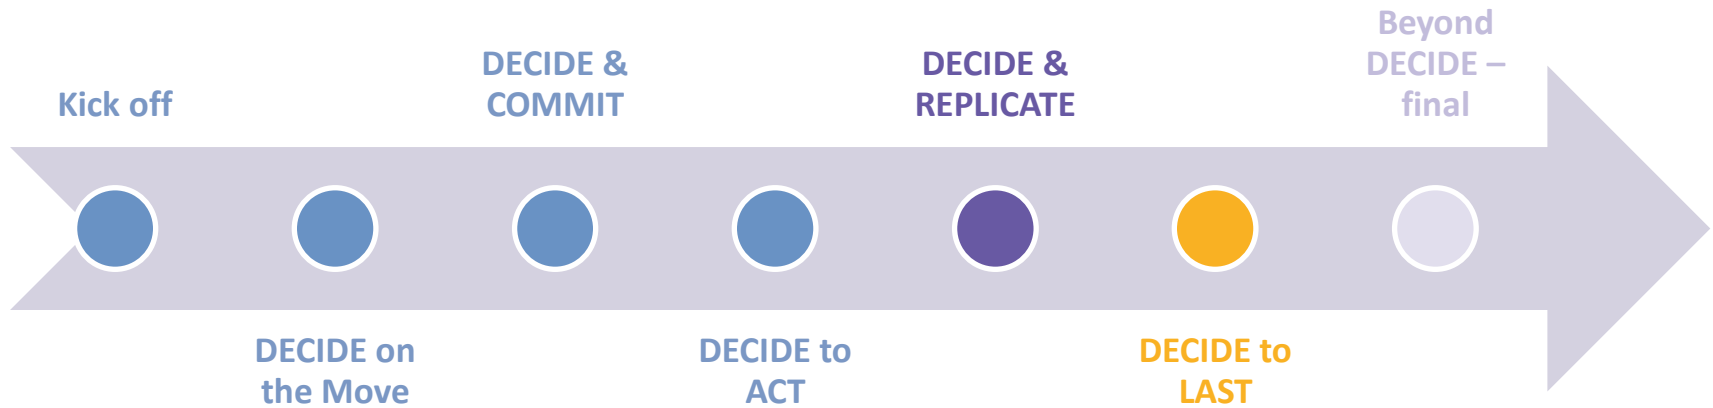

- Regulation is the key
- Regulation is not supportive to all types of collective energy actions
- EC/CA can use various business model categories to diversify operation
- EC/CA business models mainly emerging in the activities/technology and by including new types of partner organizations
- Size of EC/CA matters
- EC/CA should take inclusiveness and diversity in consideration from the beginning

# DECIDE to LAST

What's in focus for DECIDE?

# DECIDE

Need to understand **what makes EC/CAs last, how to create those conditions and provide for long lasting initiatives**

Regulatory framework in light  
of REPwoer EU and  
implementation of EC/CAs  
**June 2022**

Workshop on regulation and  
behavioral changes and youth
